

Product Inspection and Track & Trace at Centre Stage

Bickenbach, 27.05.2015: At ACHEMA, scanware electronic GmbH is exhibiting its innovative inspection systems. This year, two areas will be highlighted: Concerning Product Inspection, the 3D Colour System is a solution that offers highest security for pharmaceutical producers. In the field of anti-counterfeiting, the high-resolution Case Inspection LYNX-CAPA CI is attracting attention.

As a provider of inspection solutions along complete packaging lines, these systems are among numerous others which are exhibited live at ACHEMA and can be tried by booth visitors. The 3D system LYNX-SPECTRA 3D which has been on the market since 2008 is now available as a combined solution including high-resolution colour inspection. This system enables producers the use of three-

dimensional inspection even if construction space is scarce. A designated illumination unit has been developed in-house.

For Track & Trace, the company offers a number of solutions, from folding box to aggregation of bundles, cases and pallets. For the Case Inspection unit, the motor-driven height adjustment was optimised in cooperation with customers in Germany and Brazil. Furthermore, the implementation of a camera with a very high resolution is currently in progress.

Achema, Hall 3.1, Booth A55

scanware electronic GmbH is a privately owned company operating on an international scale. As an independent manufacturer we develop product and code inspection systems for installation on pharmaceutical packaging equipment. With 25 years of experience, scanware products are tailored to individual needs of customers, highly specialized and fully compliant with GAMP requirements. More than 2000 installations across the globe establish scanware as a renowned supplier of supreme quality equipment to all major manufacturers.
